

SSBB MULTI-PIN Board-to-Board

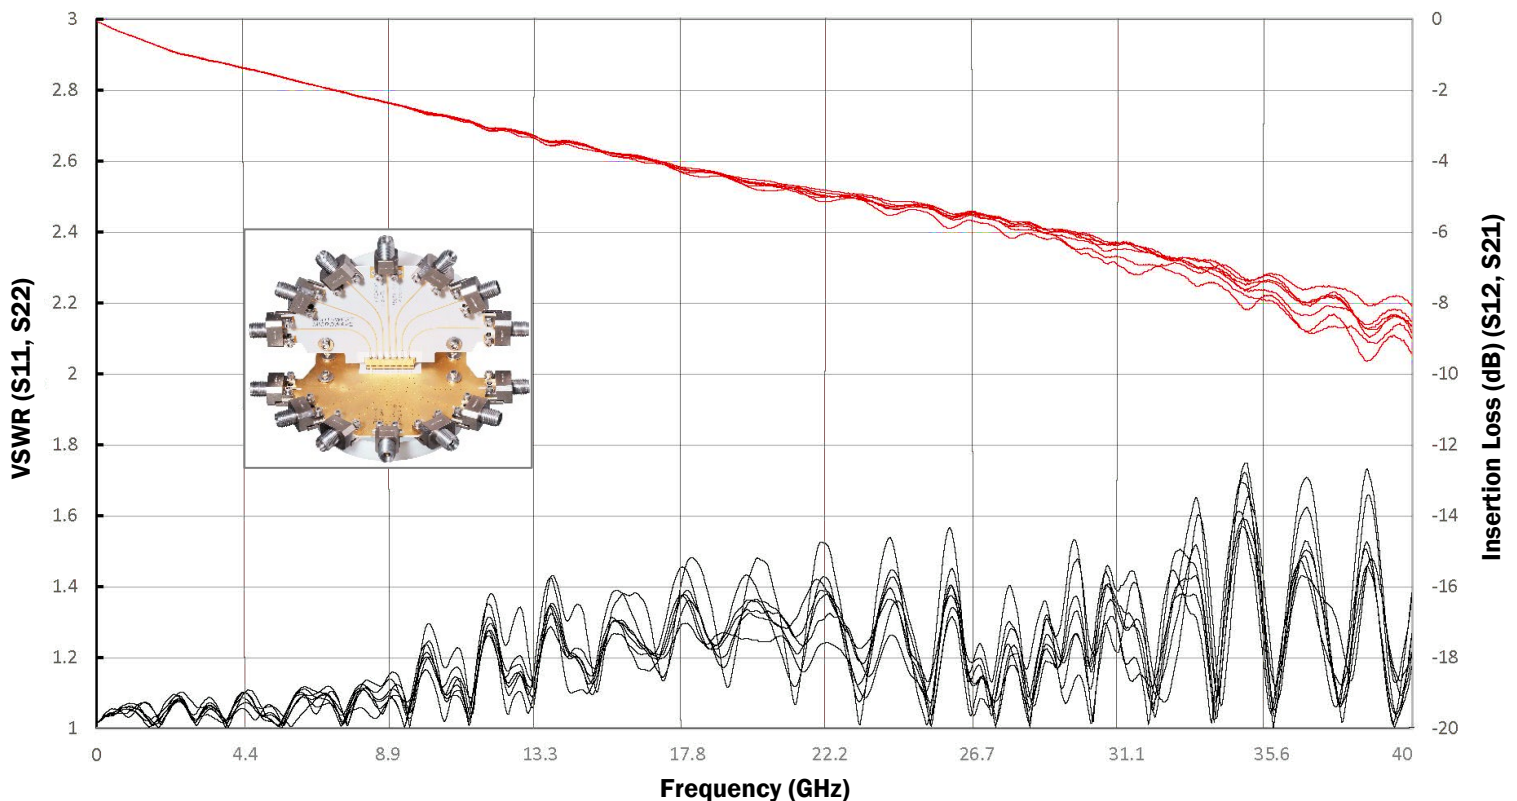

The Southwest Microwave SSBB Multi-Pin is a configurable multi-port connector that maximizes space by allowing multiple high frequency connections against close fitting circuit boards.

FEATURES

- Free configurable up to 8 connectors
- Small footprint
- DC to 90 GHz
- Suited for board-to-board or board-to-cable
- Industry's lowest mate and demate forces
- Available for Microstrip / GCPW / Stripline
- PCB layout assistance and HFSS models available

ELECTRICAL PERFORMANCE

Test Data for All 7 Lines

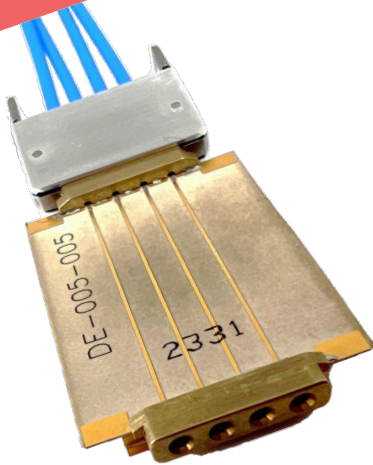

SSBB MULTI-PIN Board-to-Cable

The Southwest Microwave SSBB Multi-Pin is a configurable multi-port connector that maximizes space by allowing multiple high frequency connections against close fitting circuit boards.

FEATURES

- Free configurable up to 8 connectors
- Small footprint
- DC to 90 GHz
- Suited for board-to-board or board-to-cable
- Industry's lowest mate and demate forces
- Available for Microstrip / GCPW / Stripline
- PCB layout assistance and HFSS models available
